**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Even though there will be a lot of cloud on Sunday, UV levels will be high at times so sun protection is advised.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sun 04 Aug 2024	0.6mm	2.2mm	2.6mm

Forecast for Monday 05 Aug 2024

Weather: Cloud lowering through the early hours to give widespread hill fog. A dull start to the morning with patchy rain and drizzle and poor visibility over the higher hills. Turning mostly dry from late morning onwards with the cloud breaking at times to give occasional sunny intervals. Cloud lowering again during the evening with further rain and drizzle, perhaps heavy, arriving from the west. A windier but warmer day.

Maximum wind: Southwesterly 30-35 mph.

Chance of cloud-free hill tops 600m: 40% but 60% in northern areas during the afternoon.

Low cloud and visibility: Extensive cloud above 500-600m during the morning, this becoming periods above 700m at times during the afternoon and clearing entirely in northern areas for a time. More extensive cloud above 400-600m developing by the evening. Often poor visibility during the morning and very poor at higher levels. Becoming good for a time at lower levels in particular, but possibly deteriorating again into the evening.

Temperature: **Valleys:** Plus 13 Celsius rising to plus 23 Celsius.
At 600m: Plus 12 Celsius rising to plus 16 Celsius.
Freezing level: Well above the summits.
